FOR LIFE

Das Profi-System

Ecolith

Innen | interior | intérieur | Nr. 584  
Außen | exterior | extérieur | Nr. 594

AURO

Diese Farbkarte zeigt **134 Farbtöne für Ecolith Farben**. Die abgebildeten Farbtöne sind über das maschinelle **Farbmischsystem COLOURS FOR LIFE** erhältlich und dienen als Orientierungshilfe für die Farbauswahl. Maßgeblich für die Farbtondarstellung ist unser **COLOURS FOR LIFE Farbtonfächer**.

Die Ecolith-Farbtöne sind in 4 Preisgruppen eingeteilt, die sich durch die Farbauswahl und -intensität ergeben. Unter jeder Farbtondarstellung finden Sie daher die Preisgruppenangabe P1 bis P4. Ihr Fachhändler hält die aktuelle Preisliste bereit.

Vor großflächiger Verarbeitung empfehlen wir Probeflächen anzulegen. Bitte achten Sie beim Kauf auf **einheitliche Chargennummern**. Kalkhaltige Produkte können eine nicht vollständig gleichmäßige, wolkige Oberfläche ergeben. Beachten Sie unsere aktuellen Technischen Merkblätter auf [www.auro.de](http://www.auro.de).

---

This colour chart shows **134 shades of Ecolith paints**. The displayed colours serve as a guide for the colour selection and are available via the **colour mixing system COLOURS FOR LIFE**. For the definitive presentation of colour shades, please refer to our **COLOURS FOR LIFE colour tone fan**.

The prices for the Ecolith colour tones are divided into 4 price groups, the actual price depending on the intensity of the selected colour shade. Therefore, every paint shade is accompanied by an indication of its price group, from P1 to P4. Ask your stockist for the latest price list.

We recommend to paint a small test area first before large-scale application. Please make sure to buy products from the **same production batch**. Lime products can bring forth surfaces with a slightly irregular, „cloudy“ appearance. Observe our Technical Data Sheets on [www.auro.de/en](http://www.auro.de/en).

---

Cette carte de coloris montre des **134 nuances de peintures Ecolith**. Les couleurs montrées peuvent servir d'orientation pour le choix de teintes. Ils sont disponibles au moyen de **système de mélange des couleurs automatique COLOURS FOR LIFE**. Décisif pour la présentation de couleurs est notre **nuancier COLOURS FOR LIFE**.

Les teintes Ecolith sont répartis en 4 groupes de prix selon l'intensité de la couleur choisie. Chaque teinte reproductible donc s'accompagne d'une indication de la catégorie de prix, de P1 à P4. Votre revendeur tient la liste de prix actuelle à portée de main.

Nous recommandons d'effectuer un essai sur un endroit peu visible avant d'appliquer le produit sur de grandes surfaces. Travaillez le plus possible avec un matériau du **même numéro de lot**. Une surface pas complètement uniforme ou un aspect légèrement « nuageux » sont des caractéristiques typiques de la chaux. Observez nos fiches techniques sur [www.auro.de/fr](http://www.auro.de/fr).
